

Free markets and open competition are the backbone of what makes this country a world leader and role model. If your business model cannot compete, in any industry, you have been replaced. Please do not allow a protectionist, regulated attitude to invade our communications, broadcasting and entertainment arenas. Satellite Radio is a revolutionary addition to the way we are informed and entertained. Please do not allow traditional delivery platforms like the National Association of Broadcasters to slow down the future of communications and entertainment. Thanks your for your continued support of open markets and natural technological progression.
